

OSAMA YOSEF

Flutter Developer | Business Systems for Android, Windows & Web

Cairo, Egypt • +20 109 652 5584 • osamayosef038@gmail.com

[Portfolio](#) • github.com/osama-Yosef • [LinkedIn](#) • [Upwork Profile](#)

PROFESSIONAL SUMMARY

Flutter developer and Computer Science graduate (2026) with 1+ year of professional experience building production-grade, multi-role business systems for Android, Windows and the web. Built the order management system a metal-processing factory runs on daily, a double-entry accounting system, and a store + repair platform whose permissions live in PostgreSQL through Row Level Security. Owns products end-to-end: database schema, security rules, business logic, tests and Arabic-first (RTL) UI. Open to full-time Flutter roles and freelance projects.

KEY PROJECTS

Mokoji — Store, Repairs & Back Office

2026

Flutter • Riverpod 3 • go_router • Freezed • Supabase • PostgreSQL • FCM • Next.js

- ▶ One app, three roles (Customer, Technician, Admin): store, cart and checkout, live repair queue, warehouse, cashbox, walk-in sales and reports
- ▶ All permissions enforced in PostgreSQL via Row Level Security; sensitive operations run only through atomic SECURITY DEFINER RPC functions
- ▶ Append-only ledgers for cash and stock, price snapshots on every sale, private photos via signed URLs; wallet, InstaPay and refunds
- ▶ 46 tables, 55 RPC functions, 74 migrations, ~31k lines of Dart; companion Next.js website live on Cloudflare Workers

Al-Fardos Factory — Order Management System

2024 – Present

Flutter • Bloc / Cubit • Firestore • Firebase Auth • Cloud Messaging • Cloudinary

- ▶ Production app in daily use at Al-Fardos Metal Factory, covering the full order lifecycle from client request to floor delivery
- ▶ 4 roles in one app (Client, Engineer, Office, Floor Worker) with real-time tracking, in-app chat per order, drawing uploads and deposit flow

Al-Fardos Management — Accounting & ERP

2026

Flutter • Riverpod • go_router • Firestore • App Check • Crashlytics • Windows & Android

- ▶ Arabic accounting system: sales and purchase invoices, customers, suppliers, cashboxes, expenses, stock, reports, PDF and Excel export
- ▶ Every operation is one balanced double-entry posting written in a single atomic Firestore transaction; idempotent, integer money units
- ▶ Security rules forbid deletes and unbalanced writes (emulator-tested); pure-Dart accounting core fully unit-tested; custom roles and audit log

Length Factory — Order & Inventory System

2026

Flutter • Cubit • get_it • dartz • go_router • Firestore • Windows Desktop

- ▶ Clean Architecture (data / domain / presentation) with Either-based error handling; 3 roles with atomic checkout and payment transactions
- ▶ Security rules mirror UI permissions (workers never see prices); PDF invoices, live charts, one codebase for Android and Windows

Also: Eyan (doctor booking, Arabic/English) • Smart Institute (student & doctor portal) • Book Store • Taskati

WORK EXPERIENCE

Flutter Developer — Al-Fardos Metal Factory

Jan 2024 – Present

Cairo, Egypt • Family business — factory management & operations

- ▶ Designed and built Al-Fardos Factory from scratch as a production tool used daily by factory staff and clients
- ▶ Built Al-Fardos Management, a double-entry accounting system for Windows and Android, with tested ledger logic and security rules
- ▶ Owned the Firebase backend: Firestore schema design, security rules, storage and push notifications

Mobile Development Engineer — EraaSoft

Jan 2024 – Oct 2025

Cairo, Egypt

- ▶ Designed, developed, and deployed cross-platform mobile apps using Flutter and Dart
- ▶ Collaborated with designers and backend engineers to deliver smooth, high-performing user experiences
- ▶ Optimized app performance, implemented modern UI/UX principles, and ensured code scalability

EDUCATION

Bachelor's Degree in Computer Science & Information Systems

Sep 2021 – 2026

October University, Faculty of Computer Science — Cairo, Egypt • Graduated

- ▶ Focus areas: Mobile App Development, Flutter & Dart, Software Engineering

TECHNICAL SKILLS

Mobile & Desktop: Flutter, Dart, Material 3, responsive shells, Arabic RTL / i18n, Windows Desktop

State & Architecture: Bloc / Cubit, Riverpod, Provider, Clean Architecture, Repository pattern, get_it, go_router, Freezed

Firebase: Firestore, Auth, Storage, Cloud Messaging, App Check, Crashlytics, Security Rules

Supabase & SQL: PostgreSQL, Row Level Security, RPC functions, Edge Functions, Realtime, migrations

Web: Next.js, React, TypeScript, Tailwind CSS, Cloudflare Workers, REST APIs

Quality & Tools: Unit & widget tests, security rules testing, Git, GitHub, Android Studio, VS Code, Postman

ADDITIONAL INFORMATION

Languages: Arabic (Native), English (Professional)

Certifications: Flutter Development Training – EraaSoft | Google Developer Fundamentals

Platforms: Upwork (active freelancer), GitHub (open portfolio), osama-yosef.github.io/osama-yosef-portfolio
